

Texas Essential Knowledge and Skills for Technology Applications (Grades 6-8)

Foundations		Information Acquisition	
<p>Demonstrates knowledge and appropriate use of hardware components, software programs, and their connections.</p> <p>1A Demonstrate knowledge and appropriate use of operating systems, software applications, and communication and networking components</p> <p>1B Compare, contrast and appropriately use various input, processing, output, and primary/secondary storage devices</p> <p>1C Demonstrate the ability to select and use software for a defined task according to quality, appropriateness, effectiveness, and efficiency</p> <p>1D Delineate and make necessary adjustments regarding compatibility issues including, but not limited to, digital file formats and cross platform connectivity</p> <p>1E Uses technology terminology appropriate to the task</p> <p>1F Perform software application functions including, but not limited to opening an application program and creating, modifying, printing, and saving documents</p> <p>1G Explain the difference between analog and digital technology systems and give examples of each</p> <p>1H Use terminology related to the Internet appropriately including, but not limited to, electronic mail (e-mail), Uniform Resource Locators (URLs), electronic bookmarks, local area networks (LANs), wide area networks (WANs), World Wide Web (WWW) page, and HyperText Markup Language (HTML)</p> <p>1I Compare and contrast: LANs, WANs, Internet, and Intranet</p>	<p>Uses data input skills appropriate to the task.</p> <p>2A Demonstrate proficiency in the use of a variety of input devices such as mouse/trackball, keyboard, microphone, digital camera, printer, scanner, disk/disc, modem, CD-ROM, or joystick</p> <p>2B Demonstrate keyboarding proficiency in technique and posture while building speed</p> <p>2C Uses digital keyboarding standards for data input such as one space after punctuation, em/en dashes and smart quotation marks</p> <p>2D Develop strategies for capturing digital files while conserving memory and retaining image quality</p> <p>Complies with laws and examines issues regarding use of technology in society.</p> <p>3A Discuss copyright laws/issues and model ethical acquisition and use of digital information, citing sources using established methods</p> <p>3B Demonstrate proper etiquette and knowledge of acceptable use while in an individual classroom, lab, or on the Internet and intranet</p> <p>3C Describe consequences regarding copyright violations, including but not limited to, hacking, piracy, intentional virus setting, and invasion of privacy</p> <p>3D Identify the impact of technology applications on society through research, interviews, and personal observation</p> <p>3E Understand relevancy of technology to future careers, life-long learning, and daily living for individuals of all ages</p>	<p>Uses a variety of strategies to acquire information from electronic resources, with appropriate supervision.</p> <p>4A Use strategies to locate and acquire desired information on LANs and WANs, including Internet, intranet, and collaborative software</p> <p>4B Apply appropriate electronic search strategies in the acquisition of information including keyword and Boolean search strategies</p> <p>Acquires electronic information in variety of formats, with appropriate supervision.</p> <p>5A Identify, create and use files in various formats, such as text, bitmapped/vector graphics, image, video, and audio files</p> <p>5B Demonstrate the ability to access, operate, and manipulate information from secondary storage and remote devices including CD-ROM/laser discs and on-line catalogs</p> <p>5C Use on-line help and other documentation</p>	<p>Evaluates acquired electronic information.</p> <p>6A Determine and employ methods to evaluate the electronic information for accuracy and validity</p> <p>6B Resolve information conflicts and validate information through accessing, researching, and comparing data</p> <p>6C Demonstrate the ability to identify the source, location, media type, relevancy, and content validity of available information</p>

Texas Essential Knowledge and Skills for Technology Applications (Grades 6-8)

Solving Problems		Communication	
<p>Uses appropriate computer-based productivity tools to create and modify solutions to problems.</p> <p>7A Plan, create, and edit documents created with a word processor using readable fonts, alignment, page setup, tabs, and ruler settings</p> <p>7B Create and edit spreadsheet using all data types, formulas and functions, and chart information</p> <p>7C Plan, create and edit databases by defining fields, entering data, and designing layouts appropriate for reporting</p> <p>7D Demonstrate proficiency in use of multimedia authoring programs by creating linear or nonlinear projects incorporating text, audio, video, and graphics</p> <p>7E Create a document using desktop publishing techniques including, but not limited to, the creation of multi-column or multi-section documents with a variety of text-wrapped frame formats</p> <p>7F Differentiate between and demonstrate appropriate use of a variety of graphic tools found in draw and paint applications</p> <p>7G Integrate two or more productivity tools into a document including, but not limited to, tables, charts and graphs, graphics from paint or draw programs, and mail merge</p> <p>7H Use interactive virtual environments, appropriate to level, such as virtual reality or simulations</p> <p>7I Use technical writing strategies to create products such as a technical instruction guide</p> <p>7J Use foundation and enrichment curricula in the creation of products</p>	<p>Uses research skills and electronic communication, with appropriate supervision, to create new knowledge.</p> <p>8A Participate with electronic communities as a learner, initiator, contributor, and teacher/mentor</p> <p>8B Complete tasks using technological collaboration such as sharing information through on-line communications</p> <p>8C Use groupware, collaborative software, and productivity tools to create products</p> <p>8D Use technology in self-directed activities by sharing products for defined audiences</p> <p>8E Integrate acquired technology application skills, strategies, and use of the word processor, database, spreadsheet, telecommunications, draw, paint, and utility programs into the foundation and enrichment curricula</p> <p>Uses technology applications to facilitate evaluation of work, both process and product.</p> <p>9A Design and implement procedures to track trends, set timelines and review/ evaluate progress for continual improvement in process and product</p> <p>9B Resolve information conflicts and validate information through research and comparison of data</p>	<p>Formats digital information for appropriate and effective communication.</p> <p>10A Use productivity tools to create effective document files for defined audiences such as slide shows, posters, multimedia presentations, newsletters, brochures, or reports</p> <p>10B Demonstrate use of a variety of layouts in a database to communicate information appropriately including horizontal and vertical layouts</p> <p>10C Create a variety of spreadsheet layouts containing descriptive labels and page settings</p> <p>10D Demonstrate appropriate use of fonts, styles, and sizes, as well as effective use of graphics and page design to effectively communicate</p> <p>10E Match the chart style to the data when creating and labeling charts</p> <p>Delivers the product electronically in a variety of media, with appropriate supervision.</p> <p>11A Publish information in a variety of ways including, but not limited to, printed copy, monitor display, Internet documents, and video</p> <p>11B Design and create interdisciplinary multimedia presentations for defined audiences including audio, video, text, and graphics</p> <p>11C Use telecommunication tools for publishing such as Internet browsers, video conferencing, or distance learning</p>	<p>Uses technology applications to facilitate evaluation of communication, both process and product.</p> <p>12A Design and implement procedures to track trends, set timelines, and review and evaluate the product using technology tools such as database managers, daily/monthly planners, and project management tools</p> <p>12B Determine and employ technology specifications to evaluate projects for design, content delivery, purpose, and audience, demonstrating that process and product can be evaluated using established criteria or rubrics</p> <p>12C Select representative products to be collected and stored in an electronic evaluation tool</p> <p>12D Evaluate the product for relevance to the assignment or task</p>
