

This document is published by the ***Texas Center for Educational Technology***, a part of the Academy for Research and Professional Development in the **College of Education** at the **University of North Texas**.

The Texas Center for Educational Technology stands as one piece of an impressive infrastructure created by the Texas Education Agency to bring the benefits of technology to Texas students and educators. Created by legislative statute in June, 1990, TCET's focus is technology research, development, dissemination, and evaluation. TCET's organizational structure is uniquely collaborative, TCET board membership brings together public school educators, faculty from colleges of education, and representatives from technology vendors. Together they formulate TCET's annual research, development, and evaluation agenda.

All activities undertaken by TCET staff must support its mission and strategic plan:

to promote research and development collaboration between industry and education in order that technologies and applications can be created and adapted for integration into the public school system.

TCET disseminates the results of research, evaluation, and development activities to all public school educators in Texas using a variety of accessible communication avenues, including professional journals, Internet electronic reports, CD-ROM, publications, and monthly periodicals.

This publication is a Texas Center for Educational Technology (TCET) report. Reference to vendors is made in the interest of disseminating information to TCET members and does not serve as a product endorsement.
